

PRESS RELEASE

12th September 2024

4th STORMING Consortium Meeting in London

The 4th Consortium Meeting of the STORMING project took place in London on the 11th and 12th of September 2024, hosted by Finden Ltd. It was a valuable opportunity for partners to meet in person, exchange updates, and share new insights as the project enters its final year.

Technical partners shared updates on catalyst testing, reactor integration, and energy efficiency assessments. Dissemination and exploitation strategies were also reviewed, with a focus on STORMING's upcoming presence at Hydrogen Week 2024 and final public event planning.

Finden Ltd. also provided a tour of their state-of-the-art imaging facilities, showcasing the technology that supports material characterisation within the project.

The next meeting will be hosted by DTU in Lyngby, Denmark, in March 2025.
